Milford Marina

@Milford_Marina

Welcome

Welcome to Milford Marina and thank you for choosing us. This handbook is designed to provide you with all of the information you need to maximise your enjoyment during your stay.

Milford Marina, owned and operated by the Port of Milford Haven, is located on the picturesque Milford Haven Waterway in Pembrokeshire, and offers much more than just a berthing location. With 22 miles of navigable waterway to explore and environmentally important areas in both the waterway and around the islands, Milford Haven offers waterborne activities for all conditions.

The Marina offers comprehensive services to meet all your needs, including boat transport, hoisting, refuelling, hard storage, laundry services, free Wi-Fi and quality shower and toilet facilities. This is reflected in the 4 gold anchors awarded to us by The Yacht Harbour Association and the ICOMIA Clean Marina Award.

We host a number of RYA Active Marina events throughout the year, including a programme of training, cruising and social opportunities, and we are the first marina in Wales to join the Passeport Escales programme of reciprocal berthing. Annual berth holders who sign up to the scheme can enjoy up to 5 free nights at over 100 marinas across the south coast of England, France, Spain and Portugal.

Our aim is to ensure that you receive a first class service and that you have peace of mind, knowing that your boat will be safe and secure, and the Marina will be well maintained all year round. We are constantly looking to enhance our facilities and welcome your feedback to enable us to develop a marina you can be proud of.

Milford Marina has a great community feeling and we hope that you enjoy being part of it. We look forward to delivering a quality service that encourages you to return time and time again.

“...how far it is to this same blessed Milford: and by the way tell me how Wales was made so happy as to inherit such a haven...” – Cymbeline Act 3, Scene 2, (1611), Shakespeare

Milford Haven

Many famous people have been moved to praise the Milford Haven Waterway. William Shakespeare was so inspired by its beauty he used it as one of the settings in his play Cymbeline. Admiral Lord Nelson called it 'one of the greatest harbours in the world' in 1802 and Daniel Defoe described it as 'one of the best inlets of water in Britain'.

The Milford Haven Waterway is one of the deepest natural harbours in the world, formed by a 'Ria' or 'drowned valley' flooded at the end of the last Ice Age. The Pembroke River and the Daugleddau estuary converge and wind west to the Irish Sea, forming 22 miles of spectacular waterway.

Parts of the Haven are within the Pembrokeshire Coast National Park, the UK's only coastal National Park. Along the waterway there are various sites designated as Special Areas of Conservations and sites of Special Scientific Interest.

Accessing the Marina

Milford Marina

51°42.25N 05°02.02W

Standard Port - Milford Haven (-0500 Dover)

For tides, refer to the Port of Milford Haven Tide Tables and consult Admiralty charts 1478, 2878, 3273, 3274, 3275, Leisure Charts SC1478, SC2878, Imray 2600.11, C60

Information about the Milford Haven Waterway can be found in the Port of Milford Haven Leisure User Guide

Milford Haven Port Control can be contacted on VHF channel 12 (call sign 'Port Control')

All vessels with a LOA of 20m and over must report to Port Control as required by the Port of Milford Haven General Directions

All traffic using the lock is controlled by the Pier Head staff and it is essential that they are contacted via VHF Channel 14 (call sign 'Pier Head') before entering the dock basin

Contact Marina Control (call sign 'Marina Control') on channel 37 to be allocated a berth

Approaching the Lock

By day, look for the buoyed channel on your port side when approaching Milford Marina from St Ann's Head and line up white circular daymarks attached to the wall below the Lord Nelson Hotel.

By night, look for leading lights at 348° fixed blue in line with fixed blue. Minimum depth of approach channel is 0.9m.

Access to the dock basin is via the entrance lock. During the freeflow period, which operates 2 hours before high water, up until high water, vessels are able to move through the lock in both directions, subject to clearance from Pier Head.

Locking information is available from Marina Control and whilst every effort is made to adhere to the published lock times, operational requirements, severe weather and planned maintenance may affect the programme. The frequency of lockings increases during the main season and 5 minutes should be allowed for sluicing.

All traffic using the lock is controlled by staff at Pier Head and it is essential that they are contacted via VHF Channel 14 (call sign 'Pier Head') before you leave your berth or enter the dock basin. During all lock operations, vessels must moor alongside the pontoon/fenders provided, as directed by the duty lock keeper.

When the lock cycle is complete, allow any vessels ahead and/or outside you to leave first and moor as far forward on the pontoon as possible. If the pontoon is full, then it may be

necessary to raft up, so fenders are recommended on both sides of your vessel. All the vessels in the lock are to be secured with breast lines and springs. Please observe the 'Dead Slow' speed at all times and remain vigilant when entering or leaving the lock.

All outbound locks must be booked a minimum of 1 hour in advance through Marina Control on +44 (0) 1646 696312 or VHF Channel 37, other than freeflow when Pier Head can be contacted directly on VHF Channel 14. Berth holders are requested to remain on their berth until Pier Head directs them to proceed towards the lock.

The depth of water in the lock is a minimum of 3m at low water springs. Please refer to the schedule available from the Marina Office or the website for a full breakdown of locking times.

A holding pontoon called the Mackerel Stage lies immediately east outside the lock with 1.5m of water at chart datum for awaiting next lock operation. The Mackerel Stage should only be approached from the Dock channel due to obstructions at the eastern end. This is a holding pontoon only and vessels should NOT be left unattended. Space should remain for pick up and drop off of passengers.

The Mackerel Stage is exposed to southerly winds and passing boats can cause wake. The Mackerel Stage is removed for maintenance, around the middle of October until the beginning of April. The metal structured pontoon (directly to the west of the Mackerel stage) is reserved for commercial fishing vessels only.

Local Weather Information

Milford Haven Coastguard can be contacted on VHF Channel 16 and an inshore weather forecast is transmitted by the Coastguard at 07:50, repeated three hourly and 19:50, repeated three hourly. Strong wind and gale warnings are transmitted as soon as they have been received and on subsequent three hour forecasts.

Important Information

Berths

Boat owners are assigned a berth on arrival, but it may be necessary to occasionally move your vessel for maintenance work to the pontoons, or relocate if needed. For this reason and to accommodate all users, we ask that you keep us informed of your general sailing plans, particularly if you will be away from your berth for longer than a day or two. Visitors are allocated a berth on arrival, and should report to the Marina Office immediately to complete paperwork and receive welcome information.

Contractors

Please inform the Marina Office of any contractors working on your boat. They must report to the Marina Office on arrival and provide a copy of their fully comprehensive liability insurance. Without these details they will not be issued with a permit to work on your boat. Visiting contractors must wear a lifejacket.

Electricity

Electricity (240V/16A) is supplied to all berths via metered connections. Meters are available to purchase or hire from the Marina Office. Short term visitor electricity is included in the berthing fees, so please feel free to plug into the service bollards if you are staying for a week or less. Following this please use a metered supply. If you have any trouble locating a vacant socket, please contact the Marina Office.

Car Parking

Free car parking is available on site. If you plan to bring a large vehicle to the site, or to park your vehicle for an extended period, please request permission from the Marina Office so that they can designate an area away from any planned events. Please keep the car parks, main roadway and operations in the boatyard free from obstructions. All vehicles and contents are left on site at the owners' risk.

Diesel

The diesel berth is kept clear for fuelling only and is available by prior arrangement through the Marina Office. Diesel must be paid for at the time of fuelling. When fuelling please take care and report any spillages to the Marina Office immediately. Boat owners are obliged by law to complete a red diesel declaration form on delivery of fuel at the fuel berth. Petrol is available from the Tesco garage nearby or up river at Dale Sailing or at Lawrenny Yacht Station.

Gas Bottles

We stock a small amount of gas bottles, please enquire at the Marina Office if you wish to purchase gas.

Hard Standing & Lifting

Annual berth holders are entitled to 10 weeks free hard standing storage per year. We ask that customers inform the Marina staff of required dates as early as possible, to ensure that your hard space can be booked. We work on a first come first served basis as space is at a premium, and request that berth holders make arrangements for relaunch when their booked period is complete. Charges will be incurred for periods in excess of 10 weeks. Non-residents can usually be accommodated subject to available space, please contact the Marina Office for further information. The Marina operates a mobile boat hoist with a maximum capacity of 12 tonnes - to book this service, please contact the Marina Office.

Marina Office

The Marina Office is located on Nelson Quay in Cleddau House and is directly opposite the main gangway. Staff are happy to help 24 hours a day, 7 days a week, however the office may be locked for short periods while the duty berthing master is carrying out checks and security patrols. Please be patient or call the number displayed on the Marina Office door if the office is unmanned.

Pets

Pets are allowed at the Marina provided they are on a lead while in any public areas. Please be sure to clean up after them and put any waste in the bins provided.

Insurance

All boats require a valid insurance policy, with a minimum of third party with salvage. Please present your insurance certificate to the Marina Office on arrival and on the renewal of your policy, so that we can keep your information up to date.

Keys

If it becomes necessary to move your vessel it will be towed to an alternative berth, however you may wish to leave a spare set of keys with us at all times as there is nothing worse than getting to your boat and realising you have left them at home.

Post

There is only limited space to accept post for berth holders in the Marina Office and we are not responsible for any deliveries to berth holders. If you are expecting a parcel, please let us know. If it is an exceptionally large parcel, we regret that we cannot sign for it as we don't have a facility to store parcels safely. There is a post box in Tesco and a post office in the Spar shop on Charles Street in the Town Centre.

Slipway

Use of the slipway is free of charge for Marina customers and the Marina Office should be contacted for access. A small fee is charged for the general public.

Refuse

Bins for general waste and for recycling glass, plastic and paper are provided behind the Marina Office for the sole use of berth holders. Please dispose of waste in the bins provided. If you require the disposal of waste oil, solvent containers and rags or batteries, please contact the Marina Office who will direct you to disposal containers, which are located in the middle boatyard. When carrying out work on your boat please do not leave materials on the walkways or around the site, and any spare materials must be stored securely on your boat.

It is your responsibility to dispose of any scrap wood or materials and to clear away any mess created.

Security

A CCTV surveillance system is in place, which is viewed by Marina staff 24/7 and recorded. To maintain the safety of all berth holders, please cooperate with staff and report any suspicious activity to the Marina Office or police.

If you have allowed access to your boat to anyone else, please let us know and ask them to report to the Marina Office on arrival.

Speed Limit

Please respect the 4 knot speed limit within Milford Marina and drop to 'Dead Slow' on approach to your berth.

Please take great care when approaching and leaving your berth to avoid damage to neighbouring boats and the pontoons.

Toilets and Showers

The toilets and showers are attached to the Marina Office and are solely for the use of berth holders, their guests, and Marina staff. The toilets are checked and cleaned regularly and we ask that you respect them and leave them in the same state as you would expect to find them. Disabled facilities are located in the Marina Office and the emptying of chemical toilets is forbidden in these facilities. Please report any damage to the Marina Office.

Trolleys

Trolleys are available for a £1 deposit. Please be considerate of other berth holders when taking the trolleys along the pontoons and be sure to return them when you have finished using them, ensuring all rubbish has been removed. In the interests of safety, please do not allow children to ride in the trolleys.

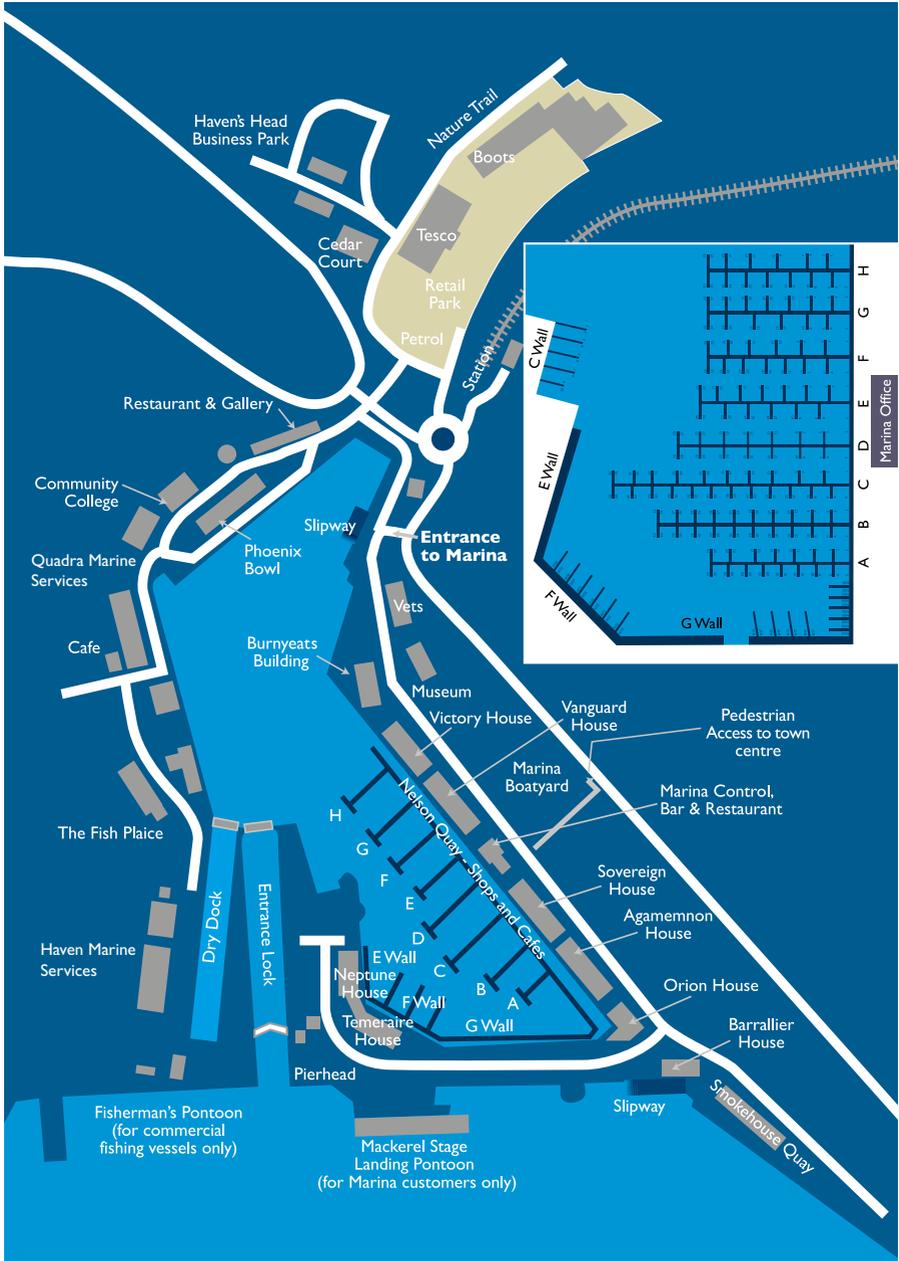

Water

Every berth has access to a nearby fresh water supply. To avoid contamination please be careful not to allow the end of the hose to drop into the Marina. We also recommend, if using the water for drinking, that you allow it to run for a few minutes before collecting it.

Wi-Fi

Wi-Fi is provided free of charge for berth holders, and visiting vessels. The Marina Team will provide you with a unique code. Wi-Fi is offered in line with our Wi-Fi Policy, a copy of which is available in Marina Control.

Marina Map

Safety

We are committed to ensuring the safety of all of our customers and their possessions, and safety measures include:

Strictly controlled pontoon access

Fixed safety ladders

SOS stations including fire extinguishers & life buoys

Fully trained first aiders

CCTV

Please familiarise yourself with the safety ladders and SOS points on the diagram.

Weather forecasts are displayed on the notice board in the entrance to the berth holder facilities, along with Notices to Mariners, which are issued by the Port of Milford Haven.

Leisure users are required to maintain a 'listen and watch' on VHF channel 12 (call sign 'Port Control') whilst navigating in and out of the Marina, but overall operational control of the lock is through Pier Head on VHF Channel 14.

General Safety Guidance

1. Take care at all times whilst on the pontoons; running is strictly prohibited
2. Take extra care during cold weather when ice builds up on the pontoons
3. Please report any damage or faults to the Marina Office
4. There is a first aid box and a defibrillator in the Marina Office, but we recommend that you have a comprehensive first aid kit aboard your vessel
5. Please be courteous to other Marina users and staff at all times
6. Swimming and diving are not permitted in the Marina
7. Use of personal watercraft, kayaks and canoes is not permitted in Milford Marina or Docks
8. Children under 16 must be supervised at all times
9. Life jackets must be worn at all times

Cables and Hoses

1. When using shore power, always ensure that the supply is connected to the vessel before connecting to, or disconnecting from the electrical socket
2. Be aware of cables and hoses on the walkways
3. Ensure all electric cables are in good condition before use and comply with I.E.E. standards
4. Ensure all cables and hoses are run safely along the pontoons so as not to cause a trip hazard
5. Keep all electrical cables clear of the water

Fire Prevention

1. We advise all owners to install a smoke alarm to reduce the risk of fire
2. All gas installations should be regularly checked by a qualified gas technician
3. Store a minimum of fuel and combustible materials on board

Berthing of Vessels

1. Approach berths dead slow and provide fenders on starboard and port sides
2. Boats should be secured with fore and aft lines and springs
3. Please ensure that anchors, anchor rollers, bowsprits and davits do not overhang pontoons
4. No vessel is to manoeuvre under sail into the lock or within the confines of Milford Marina and Docks.

In the event of a fire

1. Call the emergency services, dial 999
2. Stay calm and raise the alarm to others nearby
3. Vacate the area
4. Inform the Marina Office on +44 (0)1646 696312 who will instigate any further actions necessary
5. Tackle the fire, only if appropriately trained and if it is safe to do so

Environment

The Marina environment interacts very closely with nature and the environmentally sensitive Milford Haven Waterway. We therefore ask all berth holders to consider the environment around them.

Wildlife

Please respect the birds and other wildlife that are present around the Marina and in the waterway, making every effort to avoid interaction and reduce your speed as you approach so you do not disturb them in their natural habitat. Pembrokeshire Marine Code is a voluntary code to protect natural habitats and wildlife. At certain times, access is restricted to some seal and sea bird sites on island and coastal areas around Pembrokeshire. For further information, visit www.pembrokeshiremarinecode.org.uk and to find out more about the underwater world of the Waterway, visit www.pembrokeshiremarinesac.org.uk

Maintenance

Please ensure you take the utmost care whilst carrying out maintenance work on your boat, to avoid spillages or drips of chemicals into the water, and dispose of any used oils or batteries correctly. Please report any spillages to the Marina Office as soon as possible, in order for it to be contained or cleaned up immediately. Please do not flush or clean out bilges in the Marina. Try to use water only when cleaning hulls whilst afloat as chlorine, bleach and phosphates all impact negatively on the marine environment. Be aware of the need to regularly clean and antifoul your vessel appropriately, to reduce the spread of non-native species. For further information and advice visit www.thegreenblue.org.uk and www.nonnativespecies.org

Noise

Please keep noise to a minimum to avoid scaring wildlife and disturbing your fellow berth holders. This includes actions like not over revving your engine, playing music quietly and tying down your halyards.

Litter

Rubbish bins are provided behind the Marina Office, please ensure you place all of your waste here and do not throw anything overboard. Litter spoils the visual environment of the Marina and also creates problems for the wildlife living in the area.

Environment & Conservation

The unspoilt scenic qualities of the upper and lower reaches of the Milford Haven Waterway and coastal areas were recognised in 1952 through the designation of the Pembrokeshire Coast National Park. Many foreshore sites are designated as Sites of Scientific Interest and the special quality of the marine habitats and wildlife found around the Pembrokeshire islands and coast and within the Milford Haven Waterway are internationally recognised with the designation of the Pembrokeshire Marine Special Area of Conservation (SAC). The Waterway is a wetland of international importance and is home to one of the most diverse estuarine communities in the UK. In spring and summer, the peaceful embayments and rivers provide breeding habitats and crèche sites for various birds. Wildfowl and wader counts have observed significant numbers of shelduck, teal, widgeon, curlew and redshank with numbers of birds increasing to 25,000 in winter.

Useful Information

Milford Marina caters for all your boating needs in one location and this section details some of the marine businesses operating on site and nearby.

Stephen Ratsey Sailmakers

Offers a wide range of products and services for boat owners with specialist departments for sailmaking, covermaking, upholstery and rigging.

8 Brunel Quay, Neyland, Milford Haven, Pembrokeshire SA73 1PY

t +44 (0)1646 601561

Local Transport

Bus services operate from Milford Haven to St Davids, Haverfordwest and Pembroke Dock, stopping regularly along the routes. In addition, local bus services travel along the Pembrokeshire Coastal Path.

Please contact Traveline Cymru for further information on: **+44 (0)871 200 2233**

or visit: www.traveline.cymru

Trains run every 2 hours during the day to Manchester Piccadilly via Carmarthen, Swansea, Bridgend, Cardiff Central, Hereford, Shrewsbury, Crewe and Stockport. Journey times are approximately 2 hours 50 minutes to Cardiff and 6 hours to Manchester.

Please contact National Rail Enquiries for further information on: **+44 (0)3457 484 950**

or visit: www.nationalrail.co.uk

A number of local taxi firms operate in the area. Please contact the Marina Office for their details.

Cruising Distances & Accessibility

The Milford Haven Waterway is located in a National Park surrounded by some of the most amazing scenery in the UK.

Milford Marina is a sheltered hub to a varied and extensive cruising ground, with options to suit all ranges of experience from the novice to the blue water sailor. Support facilities are excellent with good road and rail links making crew changes easy. A number of pilot books cover the immediate and extended areas, enabling skippers to exercise their responsibilities in selecting passages and destinations appropriate to their boat and background.

The tidal flows in the area deserve particular respect and weather conditions should be considered prior to departure.

When navigating outside of the Milford Haven Waterway, please be mindful of Castlemartin and Aberporth firing ranges. Details and firing times can be found on our website under the safety section. Alternatively, Castlemartin Range Control can be contacted on +44 (0) 1646 662367 and Aberporth Range Control on +44(0) 1239 813480 or on VHF Channel 16.

Location	Nautical mileage from Milford Marina	Accessibility guidelines (Please refer to Almanac for detailed information)
Aberystwyth	88.74nm	Accessible at most states of the tide. Good shelter in marina. Care needed navigating Aberporth danger area.
Cardiff	96.55nm	Cardiff bay accessible through barrage system. Call on VHF channel 18.
Cresswell Quay	9.30nm	Accessible on spring tide by navigation up the river avoiding mud banks.
East Llanion / Cosheston Pill	5.34nm	Only accessible at high tide
Ilfracombe	50.10nm	Drying out harbour. Small number of deep water anchorages at entrance.

Location	Nautical mileage from Milford Marina	Accessibility guidelines (Please refer to Almanac for detailed information)
Kilmore Quay, Ireland	66.90nm	Exposed harbour entrance but good shelter in marina.
Lawrenny	7.04nm	Accessible all states of tide. Swing moorings operated by Lawrenny yacht station.
Padstow	73.83nm	Gate operated harbour, accessible 2 hours each side of high water.
Pembroke Millpond	5.67nm	Accessible at high water. Some swing moorings. Controlled by tidal gate. Barrage controlled by Pembrokeshire County Council +44 (0) 1437 764551
Pembroke Dock	3.89nm	Hobbs point accessible via pontoon (summer months only)
St. Ann's Head	5.89nm	Milford Haven waterway accessible all states of tide. Provides good shelter.
Skomer Island	12.04nm	Anchorage in South/North Haven. Jetty operated by commercial concern. No private craft to use jetty.
Skokholm Island	9.99nm	Limited accessibility.
	22.03nm	Accessible at High water. Drying anchorage or limited space in deep water anchorage.
Swansea	59.35nm	Marina accessible most states of tide. Dock gate controlled. VHF channel 80 Swansea marina.
Tenby	30.57nm	Drying out harbour controlled by HM on +44 (0) 1834 842717. (summer season contact only)

Visit Milford Haven Museum Today

Bring the rich history of Milford back to life

Winner of the Visit Wales “Hidden Gem Accolade” 2016

Milford Haven Museum will take you on a journey from the Bronze Age to the present day. You will visit the Quaker whalers, the deep sea fishing industry, the two world wars of the 20th century and the modern oil and gas industry.
